Caregivers, You Are the Driving Force

Make traveling with your loved one safer and easier with vehicle mobility solutions by BraunAbility (Paid Content)

BraunAbility Engineers Mobility Solutions For You

As a family caregiver, improving the quality of life for your loved one and keeping them safe are your top goals. That is why you are the driving force who makes a difference in their life every day.

Have you ever worried about your loved one falling when they get in and out of a vehicle? Do you have a safe way to transport them to doctors' appointments and family events? If your loved one is in a wheelchair or has limited mobility, there are safety and mobility improvements you have likely done at home. However, you can easily and affordably make improvements to your vehicle too. A fully accessible vehicle or a mobility product that's added to your existing vehicle can make all the difference in both of your lives.

3 Ways Wheelchair Vehicles and Mobility Solutions

1. Improved Safety

You know first-hand, loss of independence has both physical and emotional consequences. Having a vehicle that is fully equipped to meet your loved one's needs is priceless. A mobility solution like a **vehicle transfer seat** helps those who struggle to safely get in and out of a vehicle. The transfer seat is also ideal for wheelchair users who prefer to drive or ride in the vehicle seat. The **rotating seat lift** makes entering and exiting tall vehicles easy and strain-free and can be installed in 200 types of SUVs, minivans, and trucks. Now, trips to the grocery store, errands, doctor appointments, and even road trips are possible. You have the ABILITY to travel safely, and that gives everyone peace of mind.

2. More Independence

Every wheelchair user and caregiver deserves a choice when it comes to mobility solutions that enable more independence. BraunAbility makes this possible with a lineup of **accessible vehicles from auto manufacturers you trust**. Options include side-entry or rear-entry wheelchair minivans with in-floor or foldout wheelchair ramps and even accessible SUVs. There are also options to add a new conversion on a pre-owned minivan to make it accessible for wheelchair users. Mobility solutions like a **wheelchair lift** – which raises the occupant to the vehicle by way of remote control – can be added to full-size vans. No matter which solution is right for you, these options make getting in and out of the vehicle easier and safer. You have the ABILITY to be more independent.

3. Cost-Effective Choices

You can rest assured knowing there are transportation options out there that won't break the bank. From **reasonable financing plans to certified pre-owned vehicles**, you can afford to find vehicle mobility solutions that will meet your needs today and down the road. Looking for an accessible vehicle for a day, week, or month? Long- or short-term rentals are also possible. The BraunAbility Finance team will work with you to find the best mobility solution without compromising quality. No matter what your needs are, they have solutions to fit every individual, every lifestyle, and every budget. Local mobility consultants are available to help assess what fits your lifestyle and budget best. Select retail partners even offer online shopping. You have the ABILITY to choose what fits your budget.
